

Extruded Thrusters

MFD Extruded Thrusters

Chrome plated stainless steel guide shafts optimize bearing performance

Mounting flexibility:

- Through & C-bore
- Tapped bottom
- Tapped rear
- Bottom T-slots

Bronze bushing for heavy loads, or ball bushings for tighter precision and high speeds

Dowel holes on all mounting surfaces

Anodized aluminum cylinder body

Steel tooling plate

Tracks for flush-mounted position sensors

Top and side porting included standard

The same superior value you have come to expect in MFD Air Preparation and Valve products is now available in an actuator series. The MTCM/MTCL Extruded Thrusters are compact, rugged actuators, designed to give you a long-lasting, cost-effective solution in space-constrained applications. Highlights of the offering include:

- Clean, compact extruded Aluminum body for maximum mounting efficiency
- Available with bronze bearings (heavy side-loading) or ball bushings (precision, high-speed)
- Magnetic piston for position-sensing included on all models
- Multiple port locations included for plumbing flexibility
- Eight bore sizes (12mm, 16mm, 20mm, 25mm, 32mm, 40mm, 50mm, 63mm) available in strokes up to 250mm
- Interchangeable with popular international brands
- Supported by 5,000+ unit inventory in Chicago, IL

MFD Extruded Thrusters

The MFD Extruded Thruster is a rugged, guided actuator with a cylinder integral to the thruster block. The sleek body incorporates switch mounting, for a clean, space-efficient package.
